EDUCATION

Graphic Era Deemed University, Dehradun
Master of Computer Applications (MCA) — CGPA: **8.00/10**

Jun 2024 – May 2026

EXPERIENCE

Hind AI, Dehradun

Mar 2026 – Present

Junior Software Engineer (Founding Team)

- Developed backend and full-stack features using Node.js, FastAPI, Next.js, PostgreSQL, and Redis for an AI-powered education platform.
- Designed and maintained REST APIs for authentication, user management, and core platform workflows, securing access with JWT and Role-Based Access Control (RBAC).
- Optimized PostgreSQL queries and added Redis caching, reducing average API response latency by **20%**.
- Triaged and resolved **70+ production issues** across APIs, databases, and deployments, improving platform reliability and release stability.
- Engineered a RAG pipeline for document chunking, embedding, and Qdrant indexing to support semantic search and context-aware retrieval.
- Containerized backend services with Docker and managed production deployments on AWS EC2.

Crobstacle Ventures LLP, Dehradun

Dec 2025 – Jan 2026

Software Engineer Intern

- Built backend APIs using Node.js, Express.js, and MongoDB for authentication, input validation, and core business workflows.
- Implemented JWT-based authentication and asynchronous processing to support scalable and reliable backend workflows.
- Collaborated with senior engineers through Git-based development and pull-request reviews to ship features and resolve production issues.

PROJECTS

E-Commerce Backend Platform

GitHub

Java, Spring Boot, Spring Data JPA, Spring Security, PostgreSQL, React.js, REST APIs

- Built a full e-commerce backend using **Java and Spring Boot** for product catalog, cart, order, and user management.
- Designed a normalized PostgreSQL schema using Hibernate and Spring Data JPA, applying Repository, DTO, and Builder design patterns.
- Secured REST APIs with Spring Security and JWT-based authentication and integrated a React.js frontend through Axios.

HireBuddy — Multi-Agent Recruitment Platform

Live | GitHub

Next.js, Node.js, FastAPI, PostgreSQL, MongoDB, Qdrant, Claude API, Gemini

- Architected a 9-stage pipeline for resume parsing, scoring, ranking, and shortlisting using Claude and Gemini APIs.
- Designed PostgreSQL and MongoDB data models with modular REST APIs supporting recruiter workflows and candidate evaluation.
- Deployed the platform to production with retry and fallback handling, processing **20,000+ candidate records** for automated resume screening.

Lead Distribution System — Event-Driven Backend Platform

Live | GitHub

Node.js, React.js, MongoDB, n8n, Telegram API

- Engineered an event-driven lead assignment system with explicit state transitions and idempotent retry handling to prevent duplicate assignments.
- Built REST APIs for lead ingestion, assignment, and status tracking using MongoDB.
- Automated lead routing with n8n workflows and Telegram Bot API notifications for sales agents.

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, C++

Backend: Spring Boot, Spring Data JPA, Spring Security, Node.js, Express.js, FastAPI, REST APIs

Databases: PostgreSQL, MongoDB, MySQL, Redis, Qdrant

Cloud & Tools: AWS EC2, AWS S3, Docker, Linux, Git, Postman

Frontend: React.js, Next.js, HTML, CSS

Core CS: Data Structures & Algorithms, Object-Oriented Programming, DBMS, Operating Systems, CN, System Design

ACHIEVEMENTS

- Ranked **Top 100 (Top 0.7%)** in **HackWithInfy** among **15,000+ participants** nationwide.
- Solved **800+ DSA problems**, ranking in the **Top 2%** on GeeksforGeeks.
- **AWS Certified Cloud Practitioner** (2025).
